EVOptica

OPHTHALMIC INSTRUMENTS / TECHNOLOGY OVERVIEW

Custom contact lenses

Optical research

Research connecting ocular aberration measurement, optical simulation and customized contact lens design.

INSTRUMENT / ORIGINAL DESIGN IMAGE

Technology for eye care

01 / Customized optical correction research

02 / Wavefront-informed lens concepts

03 / Academic collaboration

RESEARCH & TECHNOLOGY FOUNDATION

This overview documents research and instrument-development know-how. It is not a claim of product clearance or a clinical performance specification.
